

# The Redstone Door Test

國中 7 年級      第 1 週      預計 50 分鐘

## 這週要帶走的能力

- 看懂紅石自動門如何找出問題
- 從文章找出主旨、細節與推論證據
- 正確使用 Do / Does，後面的動詞不加 s
- 用本週單字寫出一個測試想法

分成兩次、每次約 25 分鐘。第一次先看核心單字，再讀短文並完成跟著做。第二次先做隔天回想，再完成獨立題、會考型題目與短句。遇到長句時先找主詞、動作與 because 或 but，不必一次翻譯整句。

## 先想一想

你做了一扇紅石自動門，但它打開後不會關。你會一次改掉全部零件，還是先測試一個部分？先用中文說出理由。

## 本週核心單字

**build** v. • new

建造

Mia and Ben build a base.

Mia 和 Ben 建造一座基地。

**design** n./v. • new

設計；設計

They test the door design.

他們測試門的設計。

**base** n. • new

基地

The base has an iron door.

基地有一扇鐵門。

**automatic** adj. • new

自動的

They want an automatic door.

他們想要一扇自動門。

**signal** n. • new

訊號

The lever sends a signal.

拉桿送出一個訊號。

**lever** n. • new

拉桿

Ben puts a lever outside.

Ben 在外面放一個拉桿。

**test** n./v. • new

測試；測試

They test one part at a time.

他們一次測試一個部分。

**problem** n. • new

問題

The open door is a problem.

一直開著的門是一個問題。

**decide** v. • new

決定

They decide to add a button.

他們決定加上一個按鈕。

**safe** adj. • new

安全的

The final base is safe.

最後的基地是安全的。

**button** n. • new

按鈕

The button sends a short signal.

按鈕送出短暫訊號。

**careful** adj. • new

仔細的；謹慎的

Mia chooses a careful test.

Mia 選擇一個仔細的測試。

## 閱讀：The Redstone Door Test

Mia 和 Ben 正在蓋 Minecraft 基地。他們的門打開後不會關。閱讀時請標出：問題是什麼、每次測試了什麼、最後如何修正。

讀法提示：每段先圈人物，再畫出主要動作；不用逐字翻譯。；看到 but，注意前後轉折。；看到 so，往前找原因、往後找結果。；主旨題要選能涵蓋四段的選項，不要只選某個零件。

Mia and Ben want to build a safe base before night. Their plan has one special part: an automatic front door. They use Redstone, a lever, and an iron door. Mia draws a simple design first. Ben checks the space near the door. They both want players to enter quickly, but they do not want monsters to follow them inside.

First, Ben puts the lever outside the base. When he pulls it, the lever sends a signal through the Redstone line. The door opens. The first test looks good, so Ben says the design is ready. Mia is not

sure. She asks, “Does the door close after a player enters?” They wait, but the door stays open. Now they have a problem.

Ben wants to move every part, but Mia chooses a careful test. They check one part at a time. Does the door work? Yes, it does. Does the Redstone line carry the signal? Yes, it does. Then they check the lever. The lever is still on, so the signal never stops. They use a button for the next test. The button sends a short signal, and the door closes again.

Before they finish, Mia asks two more questions: “Does the button work from inside?” and “Do players have enough time to enter?” They test the door twice from each side. Then they decide to add a second button inside the base. Their final design is simple and safe. Mia and Ben learn that clear questions and careful tests can solve a problem without changing everything.

## 閱讀策略：拆成問題、測試、結果

長句不必一次翻完。先問：出了什麼問題？測了哪個部分？結果有沒有改變？細節題回原句，主旨題要把多段共同內容合起來。

Problem: What does not work?

Test: What do they check or change?

Result: What happens next?

### 看一個完整例子

**The door opens, but it does not close.**

but 表示轉折；前面成功、後面失敗，所以問題是門不會關。

**The button sends a short signal, and the door closes again.**

先看到短訊號，再看到門關上；這是一組測試與結果。

### 容易踩到的地方

~~看到 Redstone 就選和遊戲知識最像的答案~~

**只用文章明確寫出的問題、測試與結果作答。**

會考閱讀測的是文本證據，不是誰更懂 Minecraft。

## Do / Does：先看主詞，再讓動詞回原形

主詞是 he、she、it、單數人名或單數事物時用 Does；主詞是 I、you、we、they 或複數時用 Do。Do 或 Does 已表示問句，所以後面的主要動詞用原形。

Do + I/you/we/they/複數主詞 + 原形動詞 ...?

Does + he/she/it/單數主詞 + 原形動詞 ...?

### 看一個完整例子

**Does the door close?**

the door 是單數事物，用 Does；close 不加 s。

**Do the players have enough time?**

the players 是複數，用 Do；have 保持原形。

### 容易踩到的地方

~~Does Mia tests the door?~~

**Does Mia test the door?**

Does 已帶有第三人稱單數訊息，test 不能再加 s。

跟著示範

## 跟著做：先找明顯線索

先看題目要找問題、規則或字義，再回指定段落圈出證據。

提示：第 2 段說明門的問題；Do 或 Does 題先看主詞。

**g-detail-problem • supported**

第一次測試後，門出現什麼問題？

---

---

**g-grammar-door • supported**

選出正確問句。

- A. Do the door close?
- B. Does the door close?
- C. Does the door closes?
- D. Is the door close?

**g-vocab-signal • supported**

文中 signal 最接近哪個意思？

- A. 裝飾
- B. 訊號
- C. 聲音
- D. 工具

自己完成

## 獨立做：把提示拿掉

不看上方提示完成三題；作答後再回文章檢查證據。

**i-main-idea • on-level**

What is the main idea of the passage?

- A. A large base always needs many doors.
- B. Clear questions and careful tests help solve a design problem.
- C. Players should never use a lever.
- D. Redstone only works at night.

**i-grammar-ben • on-level**

把提示字排成正確問句：Ben / test / the door / Does

---

---

**i-detail-button • on-level**

Why do Mia and Ben use a button for the next test?

---

---

---

會考型轉移

## 會考型轉移：比較四個合理選項

先刪除和文章相反或只抓單一細節的選項，再選有完整證據的一項。

**c-inference-mia • stretch**

What can the reader infer about Mia?

- A. She changes one factor to find the cause.
- B. She does not care if the base is safe.
- C. She changes every part when a test fails.
- D. She knows every answer before testing.

**c-context-careful • on-level**

In paragraph 3, a careful test means a test that \_\_\_\_.

- A. checks one part at a time
- B. changes everything at once
- C. uses no questions
- D. stops before finding evidence

### c-purpose-questions • stretch

Why does the writer include Mia's questions in the last paragraph?

- A. To show what the final tests need to check
- B. To show that Mia does not understand doors
- C. To teach players to build a larger base
- D. To explain why monsters use buttons

寫出自己的答案

## 產出：把規則用在自己的基地

先檢查 Do 或 Does 與動詞原形，再用核心字寫出測試想法。

提示：可以從 Does the ...? 或 I test ... 開始。

### p-does-question • on-level

請用 Does 寫一個關於自動門的正確問句。

---

---

---

### p-design-fix • stretch

基地有一扇不會關的門。請用 1-2 句英文寫你會測試什麼；至少使用 test、problem、signal、button 中的一字。

---

---

---

---

隔天提取

## 隔天回想：先不要翻前頁

隔一天先從記憶完成；寫完後才回前頁訂正並圈出忘記的規則或單字。

**r-grammar-rule • on-level**

隔一天、不翻前頁：Does 後面的動詞要用什麼形式？請寫一個例子。

---

---

---

**r-vocab-sentence • on-level**

隔一天，從 design、safe、decide、careful 選一字造句。

---

---

---

## 自己檢查

- 我能指出門的問題、測試與結果。
- 我會先看主詞，再選 Do 或 Does。
- 我記得 Do 或 Does 後面的動詞不加 s。
- 我能用文章證據排除看似合理但錯誤的選項。
- 我能用一個核心字寫完整句子。

---

---

---

## 帶走一點，隔天再想一次

隔一天再次提取閱讀方法、Do 或 Does 規則與核心字；不用重新讀完整篇文章也要先試著回答。(約 15 分鐘)

### **h-grammar-player • on-level**

選出正確問句。

- A. Do the player need a button?
- B. Does the player needs a button?
- C. Does the player need a button?
- D. Is the player need a button?

### **h-reading-next-test • stretch**

如果按鈕只能從外面使用，依本文方法，下一個 test 應檢查什麼？

---

---

---

### **h-vocab-cloze • on-level**

The builder checks the door before night because the base must be \_\_\_\_.

- A. safe
- B. signal
- C. lever
- D. problem

### **h-writing-two-questions • stretch**

寫兩個問題：一個用 Do，一個用 Does。主題可以是 Minecraft 建造或日常生活。

---

---

---

---

---
